Statistical description of rates of mass loss of platinum-rhodium gauzes in the ammonia oxidation process 199

# Subject Index

Acid sites
Cracking of n-heptane on fluorinated γ-alumina catalysts in the presence of hydrogen. Catalytic activity and nature or acid active sites 175

Acid sites
Hydroconversion of n-heptane on catalysts containing platinum, rhenium and platinum–rhenium on sodium mordenite 283

Acid sites
Characterization of acid catalysts by means of model reactions. I. Acid strength necessary for the catalysis of various hydrocarbon reactions 123

Acidity
Alkylation of phenol over simple oxides and supported vanadium oxides 89

Acidity
Proton acidity in modified γ-alumina 27

Adsorption
Characterization of zeolite Nu-10 by $^{129}Xe$ NMR spectroscopy L1

Alcohol dehydrogenation
Platinum/carbon oxidation catalysts. VIII. Selecting a metal for liquid-phase alcohol oxidations 187

Alkene isomerization
Selective conversion of syngas to alkenes and aromatic-rich gasoline on iron–manganese–ruthenium containing composite catalysts 219

Alkenes
Bimetallic catalysts comprised of dissimilar metals for the reduction of carbon monoxide with hydrogen 351

Alumina
Proton acidity in modified γ-alumina 27

Alumina
Effects of crystallinity and morphology on the surface properties of alumina 141

Ammonia oxidation
Statistical description of rates of mass loss of platinum–rhodium gauzes in the ammonia oxidation process 199

Antimony heptafluoride
Recent progress in solid superacid – a review 1

Asbestos
Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Influence of reaction parameters and catalyst acidic properties as studied by ammonia TPD technique 161

Bioethanol-to-ethylene
Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Influence of reaction parameters and catalyst acidic properties as studied by ammonia TPD technique 161

Carbon dioxide
Carbon dioxide reforming of methane with supported rhodium 293

Carbon monoxide hydrogenation
Catalytic properties of NiX zeolites in the presence of cerium additives 45

Catalyst characterization (AAS, SEM, XRD, TPD, RAI)
Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Influence of reaction parameters and catalyst acidic properties as studied by ammonia TPD technique 161

Catalyst characterization (acid site determination)
Cracking of n-heptane on fluorinated γ-alumina catalysts in the presence of hydrogen. Catalytic activity and nature or acid active sites 175

Catalyst characterization (acidity)
Hydroconversion of n-heptane on catalysts containing platinum, rhenium and platinum–rhenium on sodium mordenite 283

Catalyst characterization (acidity)
Characterization of acid catalysts by means of model reactions. I. Acid strength necessary for the catalysis of various hydrocarbon reactions 123

Catalyst characterization (adsorption, XRD)
Selective conversion of syngas to alkenes and aromatic-rich gasoline on iron-manganese-ruthenium containing composite catalysts 219

Catalyst characterization (EDS, STEM, XPS)
Bimetallic catalysts comprised of dissimilar metals for the reduction of carbon monoxide with hydrogen 351

Catalyst characterization (extraction, TEM)
Dispersion of platinum on silica and alumina by chemical extraction 75
Catalyst characterization (FT-IR, Raman spectroscopy, TPR)
Structure of phosphorus containing CoO–$MoO_3/Al_2O_3$ catalysts 99
Catalyst characterization (FT–IR, TEM, XRD)
Effects of crystallinity and morphology on the surface properties of alumina 141
Catalyst characterization (IR, acidity)
Proton acidity in modified $\gamma$-alumina 27
Catalyst characterization (LRS, XPS)
Selective oxidation of propene over supported vanadium oxide catalysts (62) 235
Catalyst characterization (NMR)
Characterization of zeolite Nu-10 by $^{129}Xe$ NMR spectroscopy L1
Catalyst characterization (TPR, XPS, XRD)
Structure of unpromoted and alkali-metal promoted $MnO_x$-based catalysts for oxidative coupling of methane 311
Catalyst characterization (XPS, XRD)
Phase and surface composition and dispersion of MoO3 in $MoO_3/Al_2O_3$–$SiO_2$ catalysts 253
Catalyst characterization (XPS)
X-ray photoelectron spectroscopy study of supported noble metal catalysts prepared by spontaneous electrodeposition 63
Catalyst characterization (XPS)
Regeneration of a sulfur poisoned $Pd/Al_2O_3$ catalyst during the selective hydrogenation of styrene 275
Catalyst characterization (XRD)
Preparation of a catalyst for hydrogenolysis of methyl oleate using hydrogen storage alloy 209
Catalyst preparation (dry impregnation, incipient wetness)
Effect of support microporosity and preparation conditions on the reducibility of $Pt/Al_2O_3$ catalysts L9
Catalyst preparation (wet impregnation)
Structure of phosphorus containing CoO–$MoO_3/Al_2O_3$ catalysts 99
Catalyst preparation electrodeposition
X-ray photoelectron spectroscopy study of supported noble metal catalysts prepared by spontaneous electrodeposition 63
Catalytic properties of NiX zeolites in the presence of cerium additives 45
Cerium
Catalytic properties of NiX zeolites in the presence of cerium additives 45
Chromia–alumina
Proton acidity in modified $\gamma$-alumina 27
Cobalt oxide–molybdenum oxide/alumina
Structure of phosphorus containing CoO–$MoO_3/Al_2O_3$ catalysts 99
Cobalt–molybdenum
Bimetallic catalysts comprised of dissimilar metals for the reduction of carbon monoxide with hydrogen 351
Cobalt–tungsten
Bimetallic catalysts comprised of dissimilar metals for the reduction of carbon monoxide with hydrogen 351
Coke formation
Carbon dioxide reforming of methane with supported rhodium 293
Competitive adsorption
Influence of the competitive adsorption of polyaromatic and vanadylporphyrin molecules on the deactivation of a Ni–$MoS_2$–$Al_2O_3$ catalyst L15
Composition
Phase and surface composition and dispersion of MoO3 in $MoO_3/Al_2O_3$–$SiO_2$ catalysts 253
Copper oxide–magnesium oxide
Preparation of a catalyst for hydrogenolysis of methyl oleate using hydrogen storage alloy 209
Cracking
Characterization of acid catalysts by means of model reactions. I. Acid strength necessary for the catalysis of various hydrocarbon reactions 123
Crystallinity
Effects of crystallinity and morphology on the surface properties of alumina 141
Cumene cracking
Proton acidity in modified $\gamma$-alumina 27

Dispersion
Dispersion of platinum on silica and alumina by chemical extraction 75
Dispersion
Phase and surface composition and dispersion of MoO3 in $MoO_3/Al_2O_3$–$SiO_2$ catalysts 253

Disproportionation
Characterization of acid catalysts by means of model reactions. I. Acid strength necessary for the catalysis of various hydrocarbon reactions 123

Ethanol dehydratation
Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Influence of reaction parameters and catalyst acidic properties as studied by ammonia TPD technique 161
Ethene oxidation
Influence of feed water vapour on the selective oxidation of ethylene over silver catalyst 265
Ethylbenzene dehydrogenation
Catalytic activity of modified $\gamma$-alumina for the oxidative dehydrogenation of ethylbenzene 35
EuroPt-1
Dispersion of platinum on silica and alumina by chemical extraction 75
Exhaust gases
X-ray photoelectron spectroscopy study of supported noble metal catalysts prepared by spontaneous electrodeposition 63

Fatty acids
Preparation of a catalyst for hydrogenolysis of methyl oleate using hydrogen storage alloy 209
Fisher–Tropsch
Fixed bed and slurry reactor studies of Fischer–Tropsch synthesis on precipitated iron catalyst 329
Fixed-bed reactor
Fixed bed and slurry reactor studies of Fischer–Tropsch synthesis on precipitated iron catalyst 329
Fluorine-alumina
Cracking of n-heptane on fluorinated $\gamma$-alumina catalysts in the presence of hydrogen. Catalytic activity and nature or acid active sites 175

Gasoline
Selective conversion of syngas to alkenes and aromatic-rich gasoline on iron-manganese-ruthenium containing composite catalysts 219

Heptane cracking
Cracking of n-heptane on fluorinated $\gamma$-alumina catalysts in the presence of hydrogen. Catalytic activity and nature or acid active sites 175
Heptane hydroconversion
Hydroconversion of n-heptane on catalysts containing platinum, rhenium and platinum–rhenium on sodium mordenite 283
Hydrocarbon oxidation
X-ray photoelectron spectroscopy study of supported noble metal catalysts prepared by spontaneous electrodeposition 63
Hydrodemetallization
Influence of the competitive adsorption of polyaromatic and vanadylporphyrin molecules on the deactivation of a Ni–$MoS_2$–$Al_2O_3$ catalyst L15
Hydrotreating catalysts
Structure of phosphorus containing CoO–$MoO_3$/$Al_2O_3$ catalysts 99
Hydrotreating catalysts
Influence of the competitive adsorption of polyaromatic and vanadylporphyrin molecules on the deactivation of a Ni–$MoS_2$–$Al_2O_3$ catalyst L15

Iridium
Platinum/carbon oxidation catalysts. VIII. Selecting a metal for liquid-phase alcohol oxidations 187
Iron
Fixed bed and slurry reactor studies of Fischer–Tropsch synthesis on precipitated iron catalyst 329
Iron–alumina
Proton acidity in modified $\gamma$-alumina 27
Iron–alumina
Catalytic activity of modified $\gamma$-alumina for the oxidative dehydrogenation of ethylbenzene 35
Iron–manganese–ruthenium
Selective conversion of syngas to alkenes and aromatic-rich gasoline on iron–manganese–ruthenium containing composite catalysts 219
Isomerization
Characterization of acid catalysts by means of model reactions. I. Acid strength necessary for the catalysis of various hydrocarbon reactions 123

Isotope effect
Platinum/carbon oxidation catalysts. VIII. Selecting a metal for liquid-phase alcohol oxidations 187

Kinetics
Carbon dioxide reforming of methane with supported rhodium 293

Magnesia
Alkylation of phenol over simple oxides and supported vanadium oxides 89
Magnesia–alumina
Catalytic activity of modified $\gamma$-alumina for the oxidative dehydrogenation of ethylbenzene 35
Magnesia–alumina
Proton acidity in modified $\gamma$-alumina 27
Manganese oxide
Structure of unpromoted and alkali-metal promoted MnOx-based catalysts for oxidative coupling of methane 311
Manganese oxide/alumina
Structure of unpromoted and alkali-metal promoted $MnO_x$-based catalysts for oxidative coupling of methane 311
Methane oxidative coupling
Structure of unpromoted and alkali-metal promoted $MnO_x$-based catalysts for oxidative coupling of methane 311
Methane reforming
Carbon dioxide reforming of methane with supported rhodium 293
Methanol dehydrogenation
Platinum/carbon oxidation catalysts. VIII. Selecting a metal for liquid-phase alcohol oxidations 187
Microporosity
Effect of support microporosity and preparation conditions on the reducibility of $Pt/Al_2O_3$ catalysts L9
Molybdena–alumina
Proton acidity in modified $\gamma$-alumina 27
Molybdena–alumina
Catalytic activity of modified $\gamma$-alumina for the oxidative dehydrogenation of ethylbenzene 35
Molybdenum/alumina–silica
Phase and surface composition and dispersion of $MoO_3$ in $MoO_3/Al_2O_3$–$SiO_2$ catalysts 253

Nickel–alumina
Catalytic activity of modified $\gamma$-alumina for the oxidative dehydrogenation of ethylbenzene 35
Nickel–alumina
Proton acidity in modified $\gamma$-alumina 27
Nickel–molybdenum sulphide–alumina
Influence of the competitive adsorption of polyaromatic and vanadylporphyrin molecules on the deactivation of a Ni–$MoS_2$–$Al_2O_3$ catalyst L15

Oleate hydrogenolysis
Preparation of a catalyst for hydrogenolysis of methyl oleate using hydrogen storage alloy 209
Oxygenates
Bimetallic catalysts comprised of dissimilar metals for the reduction of carbon monoxide with hydrogen 351

Palladium
Platinum/carbon oxidation catalysts. VIII. Selecting a metal for liquid-phase alcohol oxidations 187
Palladium/alumina
Regeneration of a sulfur poisoned $Pd/Al_2O_3$ catalyst during the selective hydrogenation of styrene 275
Palladium–platinum/iron
X-ray photoelectron spectroscopy study of supported noble metal catalysts prepared by spontaneous electrodeposition 63
Phenol alkylation
Alkylation of phenol over simple oxides and supported vanadium oxides 89
Phosphorus
Structure of phosphorus containing CoO–$MoO_3/Al_2O_3$ catalysts 99
Platinum
Platinum/carbon oxidation catalysts. VIII. Selecting a metal for liquid-phase alcohol oxidations 187
Platinum/alumina
Effect of support microporosity and preparation conditions on the reducibility of $Pt/Al_2O_3$ catalysts L9
Platinum/alumina
Dispersion of platinum on silica and alumina by chemical extraction 75

Platinum/mordenite
Hydroconversion of n-heptane on catalysts containing platinum, rhenium and platinum–rhenium on sodium mordenite 283
Platinum/silica
Dispersion of platinum on silica and alumina by chemical extraction 75
Platinum–rhenium/mordenite
Hydroconversion of n-heptane on catalysts containing platinum, rhenium and platinum–rhenium on sodium mordenite 283
Platinum–rhodium catalytic pads
Statistical description of rates of mass loss of platinum–rhodium gauzes in the ammonia oxidation process 199
Polyaromatics
Influence of the competitive adsorption of polyaromatic and vanadylporphyrin molecules on the deactivation of a Ni–$MoS_2$–$Al_2O_3$ catalyst L15
Pore system
Characterization of zeolite Nu-10 by $^{129}Xe$ NMR spectroscopy L1
Propene oxidation
Selective oxidation of propene over supported vanadium oxide catalysts (62) 235

Regeneration
Regeneration of a sulfur poisoned $Pd/Al_2O_3$ catalyst during the selective hydrogenation of styrene 275
Regression models
Statistical description of rates of mass loss of platinum–rhodium gauzes in the ammonia oxidation process 199
Rhenium/mordenite
Hydroconversion of n-heptane on catalysts containing platinum, rhenium and platinum–rhenium on sodium mordenite 283
Rhodium
Platinum/carbon oxidation catalysts. VIII. Selecting a metal for liquid-phase alcohol oxidations 187
Rhodium/alumina
Carbon dioxide reforming of methane with supported rhodium 293
Rhodium–molybdenum
Bimetallic catalysts comprised of dissimilar metals for the reduction of carbon monoxide with hydrogen 351
Rhodium–tungsten
Bimetallic catalysts comprised of dissimilar metals for the reduction of carbon monoxide with hydrogen 351
Ruthenium
Platinum/carbon oxidation catalysts. VIII. Selecting a metal for liquid-phase alcohol oxidations 187
Ruthenium–molybdenum
Bimetallic catalysts comprised of dissimilar metals for the reduction of carbon monoxide with hydrogen 351
Ruthenium–tungsten
Bimetallic catalysts comprised of dissimilar metals for the reduction of carbon monoxide with hydrogen 351

Selectivity ($C_2$–$C_5$ hydrocarbons)
Cracking of n-heptane on fluorinated $\gamma$-alumina catalysts in the presence of hydrogen. Catalytic activity and nature or acid active sites 175
Selectivity (acetic acid)
Selective oxidation of propene over supported vanadium oxide catalysts (62) 235
Selectivity (alkenes)
Fixed bed and slurry reactor studies of Fischer–Tropsch synthesis on precipitated iron catalyst 329
Selectivity (aromatic-rich gasoline)
Selective conversion of syngas to alkenes and aromatic-rich gasoline on iron-manganese-ruthenium containing composite catalysts 219
Selectivity ($C_2$ hydrocarbons)
Structure of unpromoted and alkali-metal promoted $MnO_x$-based catalysts for oxidative coupling of methane 311
Selectivity ($C_{2+}$ hydrocarbons)
Catalytic properties of NiX zeolites in the presence of cerium additives 45
Selectivity (ethene)
Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Influence of reaction parameters and catalyst acidic properties as studied by ammonia TPD technique 161
Selectivity (ethylbenzene)
Regeneration of a sulfur poisoned $Pd/Al_2O_3$ catalyst during the selective hydrogenation of styrene 275

Selectivity (ethylene oxide)
Influence of feed water vapour on the selective oxidation of ethylene over silver catalyst 265
Selectivity (xylenol)
Alkylation of phenol over simple oxides and supported vanadium oxides 89
Silica
Alkylation of phenol over simple oxides and supported vanadium oxides 89
Silver/alumina
Influence of feed water vapour on the selective oxidation of ethylene over silver catalyst 265
Slurry reacto
Fixed bed and slurry reactor studies of Fischer–Tropsch synthesis on precipitated iron catalyst 329
Solar systems
Carbon dioxide reforming of methane with supported rhodium 293
Solid superacid
Recent progress in solid superacid – a review 1
Statistical testing
Statistical description of rates of mass loss of platinum–rhodium gauzes in the ammonia oxidation process 199
Steam
Selective oxidation of propene over supported vanadium oxide catalysts 235
Styrene
Catalytic activity of modified $\gamma$-alumina for the oxidative dehydrogenation of ethylbenzene 35
Styrene hydrogenation
Regeneration of a sulfur poisoned $Pd/Al_2O_3$ catalyst during the selective hydrogenation of styrene 275
Sulphur poisoning
Regeneration of a sulfur poisoned $Pd/Al_2O_3$ catalyst during the selective hydrogenation of styrene 275
Superacid
Recent progress in solid superacid – a review 1
Surface properties
Effects of crystallinity and morphology on the surface properties of alumina 141
Syngas conversion
Selective conversion of syngas to alkenes and aromatic-rich gasoline on iron–manganese–ruthenium containing composite catalysts 219
Syngas conversion
Fixed bed and slurry reactor studies of Fischer–Tropsch synthesis on precipitated iron catalyst 329
Syngas conversion
Bimetallic catalysts comprised of dissimilar metals for the reduction of carbon monoxide with hydrogen 351

Temperature-programmed reduction
Effect of support microporosity and preparation conditions on the reducibility of $Pt/Al_2O_3$ catalysts L9
Titania
Alkylation of phenol over simple oxides and supported vanadium oxides 89

Vanadia
Alkylation of phenol over simple oxides and supported vanadium oxides 89
Vanadia/alumina
Selective oxidation of propene over supported vanadium oxide catalysts 235
Vanadia/magnesia
Alkylation of phenol over simple oxides and supported vanadium oxides 89
Vanadia/silica
Selective oxidation of propene over supported vanadium oxide catalysts 235
Vanadia/silica
Alkylation of phenol over simple oxides and supported vanadium oxides 89
Vanadia/titania
Selective oxidation of propene over supported vanadium oxide catalysts 235
Vanadia/titania
Alkylation of phenol over simple oxides and supported vanadium oxides 89
Vanadylporphyrin
Influence of the competitive adsorption of polyaromatic and vanadylporphyrin molecules on the deactivation of a $Ni–MoS_2–Al_2O_3$ catalyst L15
Water vapour
Influence of feed water vapour on the selective oxidation of ethylene over silver catalyst 265

Xenon
Characterization of zeolite Nu-10 by $^{129}Xe$ NMR spectroscopy L1

Zeolite
Characterization of zeolite Nu-10 by $^{129}Xe$ NMR spectroscopy L1

Zeolites
Catalytic properties of NiX zeolites in the presence of cerium additives 45

Zeolites
Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Influence of reaction parameters and catalyst acidic properties as studied by ammonia TPD technique 161

Zeolites
Characterization of acid catalysts by means of model reactions. I. Acid strength necessary for the catalysis of various hydrocarbon reactions 123

Zeolites
Hydroconversion of n-heptane on catalysts containing platinum, rhenium and platinum–rhenium on sodium mordenite 283
